

TE Connectivity

Product Change Notification: P-18-015941 PCN Date: 10-JUN-18

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:
Positive Lock .187 series receptacle

Description of Changes

In an effort to standardize raw material on a global basis, TE Connectivity has completed a review of our current material standards for Brass connectors. This review has resulted in our decision to reduce the number of regional alloys and align at the global level by standardizing on C27400 alloy. Material certification will be supplied, by part number, upon request. Test data shows no reduction in performance and is available upon request. Requests for test documentation should be made to your local TE Connectivity Sales Engineer.
