

Customer Information Notification

2021090241 : CBTU02044 Datasheet Operating Cold Temperature Range Increase (-10C to 85C)

Note: This notice is NXP Company Proprietary.

Issue Date: Sep 30, 2021 Effective date:Oct 01, 2021

Here is your personalized notification about a NXP general announcement. For detailed information we invite you to view this notification online

Management summary

Updated Section 2 "Features and Benefits", Table 2 "Ordering Options", Table 6 "Operating Conditions" and Table 8 "Dynamic and Static Characteristics" of the CBTU02044 Datasheet.

PCN Overview

Description

Updated the following Datasheet sections:

Section 2 "Features and Benefits"

Operating temperature range: -40C to 85C

Table 2 "Ordering Options"

Temperature range increased from (-10C to 85C) to (-40C to 85C).

Table 6 "Operating Conditions"

Temperature range increased from (-10C to 85C) to (-40C to 85C).

Table 8 "Dynamic and Static Characteristics"

Added condition for High and Low level input leakage current.

Reason

Ensure the customers use the proper operating temperature range of -40C to 85C instead of -10C to 85C.

Identification of Affected Products

Product identification does not change

Anticipated Impact on Form, Fit, Function, Reliability or Quality

Operating temperature range increased from (-10C to 85C) to (-40C to 85C).

Data Sheet Revision

A new datasheet will be issued

Disposition of Old Products

Existing inventory will be shipped until depleted

The Datasheet changes won't affect the CBTU02044 product inventory.

Remarks

The CBTU02044 device functionality won't be affected by these changes.

Contact and Support

For all inquiries regarding the ePCN tool application or access issues, please contact NXP "Global Quality Support Team".

For all Quality Notification content inquiries, please contact your local NXP Sales Support team.

For specific questions on this notice or the products affected please contact our specialist directly:

Name Emilio Polo

Position Customer Quality Engineer
