General Product Description:
Modifications of RM relay cap

Description of Changes
During maintenance of the RM relay cap tool, the inner roughness was slightly softened in order to increase the readability of the cap printing - see pic 1. Besides that, the snap-in location of cap to base looks now a little bit different due to tooling reasons - see pic 2. Further, the printing on the top of the cap was slightly rearranged to improve printing quality - see pic 3. All these modifications do not have any influence of the specification or behavior of the relay.

PIC 3

Reason for Changes:
