

Product/Process Change Notice - PCN 16_0010 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

PCN Title: AD8280 Metal Mask Revision and Data Sheet Specification Changes
Publication Date: 01-Mar-2016
Effectivity Date: 30-May-2016 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Initial Release

Description Of Change

There is an increase in the internal oscillator frequency that is accomplished by rerouting one of the resistors that sets such frequency. This change affects the dynamic performance of the part, see attached Data Sheet Specification Comparison to review all specification changes.

Reason For Change

The change moves the Self-Test Completion Time distribution below 1000 ms. Based on customer feedback, Self-Test Completion Time max of 1000 ms is regarded as a key specification and has remained unchanged.

Impact of the change (positive or negative) on fit, form, function & reliability

Customers using the deglitch feature should note the new ranges for improved functionality. There is no impact on fit, form, or reliability.

Summary of Supporting Information

Qualification has been performed per AEC-Q100, Stress Test Qualification for Integrated Circuits. See attached Qualification Results Summary. Data Sheet specification changes are reflected in the AD8280 Data Sheet Rev. E.
